

Presentations and Educational Topic Expertise

GreenPlay staff regularly speak at training seminars and conferences for various agencies and state, regional, and national professional associations.

Topics vary widely depending on need, but most include providing strong information and education for running more effective parks, recreation, open space or related organizations. Typically, these sessions are 1¼ to 1½ hours in length but can be easily expanded to full day seminars.

Our staff are full-time consultants, parks and recreation professionals, and educators – not “professional speakers”; per se – but staff members provide a valuable educational service and are typically compensated in some way for their time. Compensation structures can be negotiable depending on the event, costs and time commitments necessary.

The following is a list of available presentation topics:

- ADA
- Alternative Funding
- Aquatics
- Assessing Needs and Users
- Beyond Cookie Cutter Parks & Recreation
